# Math Masters

## Grade Two

These reproducible sheets may be used to increase the speed, accuracy and fluency of the math skills in Grade Two.

To use these sheets for timed exercises, hand out the papers with the math questions face down. Put the student's name on the back. At your signal they turn the papers over and work as quickly as possible, beginning at the top left question and working across or down the rows without missing any questions. At two minutes, say "Stop!" and have each child draw a yellow hi-lighter over the answers completed. Put the hi-lighter away. Then give them time to complete the sheet.

Count the number of correct answers in the timed section and divide this score by 2 to find the per/minute score. The students can record or graph the results. The children can work to improve their individual scores. Then count the number of correct answers on the page and multiply by 2 to find the percent score. Complete the top of the page and record the scores.

# Index

Addition to 6 .....	1 - 4
Subtraction to 6 .....	5 - 8
All about 7, 8, 9, 10 .....	9 - 12
Addition to 10 .....	13 - 18
